## Light in the tunnel

The TUBE creates an impressive accent for any room with its striking but minimal cylindrical design. The simple and timeless look of this luminaire goes hand in hand with its excellent lighting output, offering a quality and professional solution in terms of light color, visual comfort and quality. To create the right appearance between the ceiling and the luminaire, we offer the luminaires with a white (RAL 9016) or black (RAL 9005) powder-coated housing. In combination with the three different reflector color choices (black, gold or white).
